PROFILE

Digital marketer with a technical background, working at the intersection of SEO, content and web. I build and optimize websites for both traditional and AI-powered search, write content that ranks, and use AI tools and code to automate the repetitive parts of the job. I want to bring that mix of marketing and technical skills to a team, turning websites into measurable sources of organic growth.

CORE SKILLS

- SEO & GEO: on-page SEO, keyword research, technical SEO audits, structured data / JSON-LD schema, entity optimization, GEO & AEO (AI search visibility), llms.txt
- AI & LLMs: daily use of LLMs (Claude, ChatGPT) for research, content and audits; prompt engineering; AI agents and MCP integrations to work directly on WordPress, analytics and SEO tools
- Code & automation: write Python scripts and automations (scraping, AI screening, auto-generated documents); build and publish apps (Android app live on Google Play); HTML, CSS, JavaScript
- Content & CMS: SEO blog & content writing, website content management, WordPress, Elementor, Astra, Rank Math, WooCommerce, Canva
- Analytics & reporting: Google Analytics, Google Search Console, Semrush, Ahrefs, Google Ads

EXPERIENCE

Junior Digital Marketer — Episto (Remote), 2026–present

- Handle on-page SEO, keyword research and SEO content for client websites, tracking results with Semrush, Ahrefs, Google Analytics and Search Console
- Client sites (team work): etkendanismanlik.com (consultancy) and proteinbox.com.tr (e-commerce) — keyword-targeted blog content and on-page SEO to grow organic traffic
- majistralcza.epis.to: building and maintaining a pharmacists' association site in WordPress/Elementor, including a consistent layout for ~600 member profile pages

Web & SEO Specialist — Knowledge Experts (KXP, kxp.biz), 2024–2026

- Supported the team in building SharePoint-based digital workplace sites for SOK Market (4,000+ stores, ERP/POS integration) and Aras Kargo (application gallery for 12,000 staff)
- Designed and built websites for clients in WordPress, from site structure to content and social media integration
- Ran SEO analyses and reported on performance using Google Search Console and Google Analytics
- mirook.com: built and optimized a multi-page website for a Belgian youth chess champion; implemented JSON-LD schema (Person, SportsEvent, FAQPage), knowledge-graph markup and an llms.txt file, and ran iterative technical SEO/GEO audits that measurably raised the site's search-health score

Front-End Developer — ViviDoctor (Belgium), 2018–2019

- Developed and optimized front-end features for a healthcare web application (AngularJS, JavaScript)

CERTIFICATIONS

- Semrush Academy — SEO Fundamentals (completed, August 2026)
- Semrush — SEO Toolkit Exam (September 2026)
- Google Analytics Certification — GA4 (September 2026)
- Google Ads Search Certification (October 2026)

- HubSpot Academy — Content Marketing Certification (November 2026)

EDUCATION

- Karel de Grote Hogeschool, Antwerp — Coursework in Applied Computer Science (2022–2025)
- Celal Bayar University, Türkiye — Coursework in Computer Science (2012–2016)
- Diyarbakir Anatolian High School, Türkiye — High School Diploma (2012)
